

ENDLESS POOL ELITE

STROKE TRAINING SYSTEM

Elite One-on-One Coaching

Introducing the Endless Pool Elite, a counter-current swimming machine that will revolutionize swim instruction. The Elite offers coaches a unique and unprecedented opportunity to analyze every element of their swimmers' stroke, while providing both coach and athlete instantaneous, real-time feedback via multiple adjustable cameras and mirrors. Most importantly, the Elite is fast, strong and smooth — faster by far than any swimming machine on the market today — as smooth as the original flume in Colorado Springs. And with units as small as 9' x 16', it fits on any deck... and in any program.

For two decades, Endless Pools, Inc., has been the world leader in counter-current swimming machines, selling over 16,000 units to homeowners, physical therapists and masters swimmers for swimming, water exercise and recovery. Our new 7.5 HP Elite pool is designed specifically for top swimmers: with a 50 second 100-yard pace, it even challenges sprinters. With the Elite, a coach can increase the current speed to a swimmer's race pace — see precisely when and how their stroke breaks down — and fix it. Immediately. You can't do that yelling across three lanes of a 50-meter pool.

The Elite is also ideal for teaching all levels of swimming, from young beginners to Masters — generating welcome income for your program. There is no better one-on-one teaching environment.

Overhead mirror for instant feedback.

0:50–hundred yard pace

University of Kentucky

Endless Pool Elite Specifications/Options

- 8' x 14' swimming area (9' 4" x 15' 4" min. footprint)
- 44" or 50" water depth
